

Dear

RE: Maths holiday work

During this last year, your Maths knowledge will have improved tremendously, however we find that over the summer break students may begin to forget some of the key mathematical skills. This is why it is so important to keep them refreshed!

We would like you to complete a minimum of 4 x hours of work from the attached booklet. We have also included a revision guide to support you with this work. If you would prefer to use online videos rather than a revision guide, I would recommend Corbettmaths.com, Maths genie and youtube. We would like you to choose 4 different topic areas to focus on. I would use your most recent test and tracker sheet to decide which topics to tackle or speak with your classroom teacher for their advice.

If you have any questions about the work please contact me apassaro@johncolet.co.uk or gelliott@johncolet.co.uk.

I have then attached the mark scheme so that you can check the work that you have completed.

Kind regards,

Mrs Passaro

Head of Maths
